

Speed and Velocity 20q analysis...

Do the following for the missed questions only: (+2 added for each MC)

- Explain the correct answer...use notes and/or blue textbook (Chp 2)
- Show complete K-U-E-S if you scored 4 or less on #13, 17, or 18 (+1 each)
- If circled...which question on the 12q was this related to...

20Q analysis format

20Q #	12 Q #	Explain Correct Answer/K-U-E-S
1	3	Speed is how fast an object travels
9	n/a	Slope is rise/run, on a d v. t graph the rise is d and the run is t...so slope is d/t which is speed.
13	6	d=240 km, t=4 h v=? $v = \frac{d}{t}$ $v = \frac{240 \text{ km}}{4 \text{ h}}$ v= 60 km/h
